Art Unit: 2811

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 14-15, drawn to a semiconductor device, classified in class 257, subclass 370.
- II. Claims 1-13, drawn to a method to make a semiconductor device, classified in class 438, subclass 22+.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, unpatentability of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by processes materially different than those/that of the group II invention, for example, in claim 1, introducing the first impurity into the semiconductor wafer to form the first active region of the first transistor, then forming the first electrode on the first active region of the first transistor and introducing the first impurity into the first electrode.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
